ABSTRACT

This study of foreign language enrollments in public secondary schools is the eleventh in a series that has been prepared by the MLA since 1958. The reports demonstrate the impact of the National Defense Education Act of 1958 on foreign language study and provide a quantitative measure of the progress made by foreign language study in the nation's high schools during the period 1958-1974. This report also shows the impact on high school foreign language enrollment of the recent trend among many colleges and universities to drop prerequisite requirements in foreign language. The report is based on a survey directed in spring and fall 1975 to all state foreign language supervisors. The results show that in Fall 1974, the public secondary schools (PSS) in the 7-12 range reported a foreign language enrollment of over 4.03 million, comprising 19.2 percent of the total PSS enrollment of nearly 21 million students. In 1970, 4.57 million foreign language enrollments were reported from the PSS population of 18.4 million students. The report consists of an introductory summary of results, summary tables, and individual tables by language which present a breakdown of enrollment data by region and state, with comparative data from surveys undertaken in 1968 and 1970. ABSTRACT

Scebold, Edward

Survey of Foreign Language Enrollments in Public Secondary Schools, Fall 1974

December 1976, 180 pp.

Modern Language Association of America, 62 Fifth Avenue, New York, N.Y. 10011

U.S. Office of Education, Division of International Education, Contract No. OEC-0-74-3411

This report is based on a questionnaire survey directed in Spring and Fall 1975 to all state foreign language supervisors. In those cases where state totals were not available, questionnaires were sent directly to the school districts.

An analysis of the compiled figures showed that in Fall 1974, the public secondary schools (PSS) in the 7-12 range reported a foreign language enrollment of over 4.03 million, comprising 19.2 percent of the total PSS enrollment of nearly 21 million students. Four years earlier, in 1970, 4.57 million foreign language enrollments were reported from the PSS population of 18.4 million students.

The report consists of an introductory summary of results, summary tables, and individual tables by language which present a breakdown of enrollment data by region and state, with comparative data from surveys undertaken in 1968 and 1970.

FOREIGN LANGUAGE OFFERINGS AND ENROLLMENTS IN PUBLIC SECONDARY SCHOOLS, FALL 1974

C. Edward Scebold

This study of foreign language enrollments in public secondary schools is the eleventh in a series that has been prepared by the Modern Language Association since 1958. Taken collectively, these reports demonstrate the impact of the National Defense Education Act of 1958 on foreign language study and provide a quantitative measure of the progress made by foreign language study in the nation's high schools during the period 1958-1974. This report also shows the impact on high school foreign language enrollment of the recent trend among many colleges and universities to drop prerequisite requirements in foreign language. The present study deals primarily with enrollments in Fall 1974, but it also presents comparative data from earlier reports, particularly from 1968 and 1970, the dates of the most recent studies.

In Fall 1974, the public secondary schools (PSS) reported for grades 7-12 a foreign language (FL) enrollment of over 4.03 million, equivalent to 19.2 percent of the total PSS enrollment of 21.0 million students. Nine years earlier, in 1965, 4.5 million FL enrollments were reported from the PSS population of 16.4 million; in 1968, 4.75 million FL enrollments were reported from the PSS population of 17.5 million students; and in 1970, 4.57 million FL enrollments were reported from a PSS population of 18.4 million students. While the PSS population increased by about 2.5 million between 1970 and 1974, the FL enrollment dropped by over one-half million. During the four-year period there was, therefore, a drop in total enrollment in foreign languages as well as a drop in the percentage of the total school population studying a foreign language.

Distribution of the FL Enrollment

In Fall 1974, the five leading modern foreign languages (MFLs)--Spanish, French, German, Italian and Russian--accounted for 94.7 percent of the total language enrollment in grades 7-12; Latin for 4.6 percent; and "other" languages, about two dozen all told, for just over one-half of one percent.

Table 1 supplies a comparison of FL enrollments in 1968 and 1970 with those in 1974. Column 2 gives the national totals, columns 3-10 provide a breakdown by region. New England continues to lead in proportion of PSS population enrolled in FL, with 35.5, and the Mideast follows, with a percentage of 32.9. These are the only regions to show a figure of over 20 percent.

Nationally, FL enrollment as a percentage of PSS population in grades 7-12 fell from 24.8 in 1970 to 19.2 in 1974, continuing a trend that began with the decrease from 27.4 in 1965 to 27.1 in 1968. An upward trend had continued unbroken from 1960, when the percentage was 23.4, to the peak reached in 1965.

Over half (53.6%) of the high school students (grades 9-12) of MFLs are studying Spanish, but even that language experienced a decrease of 120,000 enrollments since 1970, when its percentage of the total was 51.5%. French is in second place in 1974, with 31.3 percent of the total MFL enrollment, and German is third, with 12.6 percent.

Latin lost approximately 100,000 student enrollment between 1970 and 1974, dropping to less than one percent of the total FL enrollment. Italian and Russian enrolled approximately 52,000 and 17,000, respectively. Italian was the only widely taught language to show an increase in total enrollment between 1970 and 1974.

Two dozen "other" languages are taught in secondary schools, all with limited enrollments. The total enrollment in "other" languages dropped from 21,400 in 1968 to 17,000 in 1970 but has increased to 25,000 in 1974. Of the dozen "other" languages reported in 1970, only Japanese, Czech, and Swahili showed a decline of 3.7, 2.6, and 58.4 percent respectively in 1974. Chinese, Ancient Greek and Hebrew showed increases of over 200 percent and Modern Greek increased enrollments by over 500 percent. The remaining "other" FL's of 1970 showed an average increase of 44 percent.

The summary table below constitutes a capsule history of foreign language study in the 9-12 grade span of U.S. high schools over the past 85 years. In 1890, one high school student in three was enrolled in Latin, and one in six was studying either German or French. By the turn of the century, the proportion of high school students enrolled in Latin had risen to half, and in German or French, to a fifth. In 1910, Spanish made its appearance in the high school curriculum, with an enrollment of less than one percent of the school population.

Following World War I there was a dramatic shift in the balance among the languages. German, formerly the leading modern foreign language, all but disappeared from the course of study, and French became the leader. In 1922, French enrolled 15.5 percent of the high school population, Spanish followed with 11.3, and German was in last place, with less than one percent. Latin, with 27.5 percent of the high school population, almost exactly equalled the combined modern language enrollment.

The 1930's and 1940's saw a general decline in foreign language study. By 1948, only one-fifth of the high school population was enrolled in any foreign language. Spanish had emerged as the leading modern foreign language, with 8.2 percent of the high school population; French, which had not yet recovered from the catastrophic

drop it suffered in World War II, had less than 5 percent.

Beginning in 1958, the picture in modern languages brightened year by year until the decline experienced between 1968 and 1970 and now continuing to 1974. The 1974 figures show that total foreign language enrollment dropped, while PSS enrollments continued to increase. Italian was the only exception to the general downward trend: its enrollment nearly doubled, but this represents only an increase from .2 to .3 percent of the PSS population. Spanish and German show the least decline, less than 10 percent, but French again suffered a major drop of over 20 percent in enrollments and Latin continued its steady decline of the 1960's and dropped 37 percent of its enrollments. The percentage of high school students enrolled in all foreign languages decreased from 28.4 in 1970 to 24.1 in 1974.

Special Explanations

Tables of data for the individual languages are organized as follows: the numerals 3 through 8 designate the languages--Spanish, French, German, Russian, Italian, and Latin, in that order--and the letters A through G designate the seven tables into which the data for each language are organized. The pattern is consistent, so that comparisons between languages are easily made. Table 3-A, for example, shows Spanish enrollments in grades 7-12 for fall 1974, by state, with breakdown by course; Table 4-A gives the corresponding information for French, 5-A for German, and so on. Table 9-A is devoted to enrollments in languages other than the six with the largest enrollments.

The B Tables for each language show a comparison in enrollments between 1968 and 1970 and between 1970 and 1974 for the secondary grades 7-12, and give the percent of change in the enrollment over each of the periods. An additional column gives the percent of change in the total PSS student enrollment over the same period of

time, for comparison with the language enrollment changes. This high school population increase was obtained from enrollment figures published by the U.S. Office of Education. The C Tables break the same information down for grades 7-8, the D Tables for grades 9-12. Tables designated E provide state-by-state comparisons with PSS enrollments for 1974, F Tables give a breakdown for grades 7-8, and G Tables for grades 9-12.

Data Compilation

For this study, the foreign language supervisors of the following states returned complete statistical data for their enrollments: Alabama, Arkansas, California, Connecticut, District of Columbia, Hawaii, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts (1972 data), Minnesota, Mississippi, Missouri (1973 data), Montana, Nebraska, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania (1973 data), Rhode Island, South Carolina, Texas, Vermont, Virginia, Washington, and West Virginia.

Indiana and Iowa data are complete for grades 9-12 only--no information is available for grades 7-8. From the following list of states, the state supervisors of foreign language or general enrollment in secondary schools returned partial information from which estimates of total enrollment were computed: Alaska, Arizona, Colorado, Delaware, Georgia, Idaho, Illinois, Michigan, Nevada, New Mexico, Oregon, South Dakota, Tennessee, Utah, Wisconsin, and Wyoming. The state of Florida never replied to our continual requests for information.

The states of California, Minnesota, Missouri, Nevada, North Carolina and Utah did not have a breakdown of enrollment statistics for grades 7-8 separately but provided aggregate data for grades 7-12. In preparing the tables involving these states, the distribution of the enrollments between the two categories 7-8 and 9-12 was

estimated on the basis of the ratios prevailing in other states in the same regions as the states for which the breakdown was not furnished.

"General," "exploratory," and "after-school" courses were not included in the tabulation of enrollments.

A course is considered to be one full year of foreign-language study on the secondary level counted as a unit of credit toward graduation.

Percents have been rounded off to the nearest tenth except where they do not reflect distinctions unless carried to the hundredth place.

The following abbreviations have been used in the text and tables of this report:

FL(s)	foreign language(s), i.e., modern foreign languages plus Latin and Greek
MFL(s)	modern foreign language(s)
PSS	public secondary schools

1974	13,648,906	3,127,336	22.9	1,678,057	12.3	977,858	7.2	392,983	2.9	15,148	.1	40,233	.3	167,165	1.2

Note: 1. All foreign language enrollments from 1890 through 1948 are estimated from percents of the languages in the total high school enrollments given by William R. Parker, The National Interest and Foreign Languages, U.S. National Commission for the United Nations Educational, Scientific, and Cultural Organization, 1957, pp.52-53

2. The totals of the modern foreign languages (columns 5,7,9, 13) do not equal the MFL enrollment totals in column 3, since the column 3 figures include a small number of enrollments for "Other Languages." (See Table 9-A for a summary of "Other Languages" enrollments, 1974)

1/ includes course I, 7-8 enrollments; no breakdown available
2/ Spanish total for Calif. includes 3,513 enrollments for which the course level is unidentified.
3/ Total for grades 9-12 only.
4/ Level III and IV are a combined classification
5/ 1972 data
6/ Spanish total for Mass. includes 39 enrollments for which the course level is unidentified
7/ 1973 data
8/ Estimate of breakdown 7-8 and 9-12, course I is based on regional average (see intro.p.)
9/ Spanish total for Montana includes 21 enrollments for which the course level is unidentified.
10/ Spanish total for New York includes 13,238 enrollments for which the course level is unidentified.
11/ Level V and VI are a combined classification
12/ No breakdown given; levels are estimates based on regional average
13/ USA totals include 16,811 enrollments for which the course level is unidentified.
